

MYTShutters
For you

WWW.MYTSHUTTERS.COM

OUR COMPANY

Our mission is to create high quality shutters in a sustainable way and leave behind a better planet,

Therefore we own our own factory. This allows us to only use sustainable manufacturing practices, reduce our carbon footprint, maintain consistency, innovate and create eco-friendly high quality shutters.

MYTShutters

The three key drivers that distinguish **MYTShutters** from the competition, lie in the fact that we are the only shutter manufacturer which owns and manages our own factory.

This allows us to oversee the entire production process, from research to sourcing eco-friendly materials to manufacturing.

That makes us the shutter specialist, that can deliver high quality shutters created in a sustainable way.

INNOVATION

SUSTAINABILITY

QUALITY

OUR COLLECTION

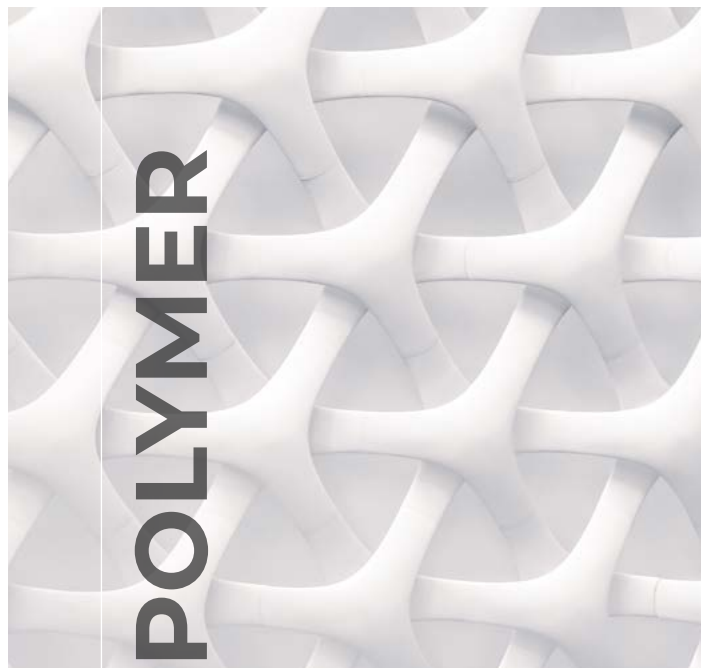

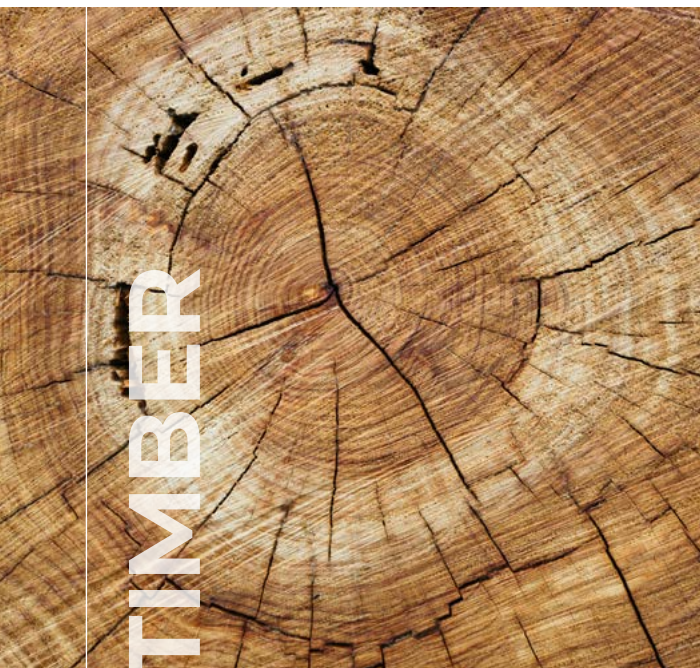

Our timber range includes:
Basswood, Paulownia and Cedar.
All our timber which is not used
gets recycled in an eco-friendly way.

The polymer range is certified
non-toxic, 100% recyclable,
lightweight and has the best
value for money.

Aluminium is the most robust
shutter in our range. Great for
external use, and has a 10-year
warranty on powder coating.

DESIGNER COLOURS **LEADING** THE LATEST TRENDS IN THE INDUSTRY

MYTShutters only use our own specially formulated paints and stains. All our colours are UV resistant, environmentally friendly, low in VOC, and only water-based paints. The highest quality for your peace of mind.

- 14 standard painted colours
- 15 standard stained colours
- Custom colours available on request

SAFE FOR THE WHOLE FAMILY

- Non-toxic water based paint
- Fire retardant
- Low VOC
- Our Polymers are Certified non-toxic
- Safe for children, asthmatics and pets

MYTShutters has over 30 years experience in the shutter industry and over 15 years experience in manufacturing. Our shutters are made with precision as standard.

We will transform your home with the most extensive range of purpose built shutter products.

- Dynamic light control

WHAT IS MYTSHUTTERS DOING TO HELP **THE ENVIRONMENT?**

MYTShutters recognises we must become conscious and responsible if we wish to protect our planet. For that reason we have already started implementing positive changes in our material sourcing and manufacturing techniques, doing our best to constantly evaluate and update our production process. We strive to lower energy consumption, recycle and reuse every last part to reduce waste, and water consumption.

- Manufactured in a sustainable way, lowering CO2 emissions
- Innovative techniques reducing waste and energy consumption
 - Free of toxic materials or ozone-depleting substances
 - Recycle and reuse all our materials
 - Cut down on excessive packaging
- Shutters are designed to be repairable rather than disposable

OUR 2026 SUSTAINABLE INITIATIVE

Putting together our Sustainability Initiative for 2026 involves analyzing waste streams, setting clear goals, working on material management, reporting sustainability efforts, and bringing in products with sustainable product certifications.
